Location: Nairobi, Kenya

PROFESSIONAL SUMMARY

Versatile Full Stack Engineer with expertise in building and integrating scalable applications. Adept at optimizing workflows, ensuring data integrity, and maintaining rigorous quality standards. Passionate about developing innovative digital solutions that blend analytical precision with technical excellence.

PROFESSIONAL EXPERIENCE

LLM Data Annotator | RWS Group (Meta AI Project)

September 2025 – October 2025 | Remote

Contributed to Meta's Llama Diamond AI project through high-precision data annotation tasks supporting large language model training and evaluation.

- Completed 71.89 hours of specialized annotation work across multiple task queues with consistent quality standards
- Performed pairwise comparisons, object tagging, and counting tasks across audio, video, and image datasets
- Maintained 100% adherence to structured annotation guidelines and quality control protocols
- Delivered accurate, timely annotations supporting foundational AI model development
- Executed detailed data labeling tasks with zero use of AI tools, ensuring human-validated quality
- Demonstrated strong pattern recognition and attention to detail in identifying and categorizing complex data elements

Full Stack Engineer | Medserv Africa

June 2024 – Present | Nairobi, Kenya

Enterprise Systems & Digital Transformation

- Led Odoo ERP implementation across Sales, CRM, and Marketing modules, training 15+ team members and achieving 100% user adoption through comprehensive documentation and systematic onboarding
- Architected and optimized relational databases for 1,200+ products with 95% data accuracy, implementing automated validation processes that improved data reliability by 85%
- Implemented OAuth authentication for Google Calendar-Odoo synchronization.

B2B Platform Development

- Built comprehensive B2B e-commerce platform featuring shopping cart, checkout system, order tracking, and mobile-responsive design
- Developed Request for Quote (RFQ) system, credit application workflow, prescription upload functionality, and AI-powered chatbot with company-specific training data
- Achieved 60% improvement in data retrieval speeds through database optimization and caching strategies

Pharmaceutical Catalogue Localization & Web Scraping

- Built automated pharmaceutical catalogue translator processing 148-page documents with 4,000+ products for Portuguese-speaking markets (Mozambique, Angola)
- Developed web scraper using Playwright to extract verified medical translations from professional translation databases (Linguee), achieving high-confidence term validations
- Implemented hybrid translation system combining 200+ manually curated pharmaceutical terms with web-scraped verified translations for improved accuracy
- Reduced translation validation time from hours to minutes through automated term verification and confidence scoring system
- Generated professional HTML and Word document outputs with proper pharmaceutical terminology formatting
- Enabled faster market entry by automating catalogue localization that previously required expensive external translation services

Contract Management System Development

- Designed and deployed interactive contract management dashboard with PDF/Excel export capabilities, file upload functionality, and real-time performance tracking
- Implemented automated approval processes and workflow systems, reducing report generation time significantly
- Created advanced data visualization features with charts, trend analysis, and real-time updates for strategic decision-making
- Developed comprehensive notification infrastructure with email integration, SMTP configuration and automated follow-up cycles

Data Integration & Middleware Development

- Developed secure Django-based middleware for automated sales order synchronization between B2B platform and ERP, achieving 100% sync accuracy with comprehensive error handling
- Built RESTful APIs and implemented DataMapper for seamless B2B-Odoo integration with real-time synchronization capabilities
- Automated sales order-to-opportunity conversion in Odoo CRM with product association and priority setting

Mobile Application Development

- Designed and developed delivery tracking mobile application using Flutter with proof of delivery system, achieving 75% completion
- Successfully migrated from flutter_map to google_maps_flutter, implementing real-time location tracking with proper permission handling
- Built robust Flutter-Django backend integration with real-time authentication and data synchronization

DevOps & Cybersecurity

- Implemented automated monitoring scripts, backup systems, and performance optimization achieving 90% server uptime with 24/7 monitoring coverage
- Deployed encryption across 11 employee devices and maintained 100% security compliance with zero incidents
- Enhanced server security by implementing Fail2Ban and SSH hardening, achieving complete elimination of brute-force attacks

Training & Documentation

- Delivered comprehensive training sessions on new systems and features, including Alpha simulation testing and beta testing coordination
- Created detailed user guides, technical manuals, and process workflows for B2B, contract management, and CRM systems
- Developed Standard Operating Procedures (SOPs) for customer onboarding, sales processes, and system integrations

Key Achievements:

- Successfully onboarded 9 new customers (Q1-Q2 2025) with streamlined technical processes
- Achieved 100% data migration success rate across multiple system integrations
- Implemented enterprise-grade security measures with zero security incidents
- Enhanced team productivity through comprehensive system training and documentation

Technical Stack: Laravel, PHP, JavaScript, Python, Django, Flutter, Odoo, XML-RPC, RESTful APIs, MySQL, Tailwind CSS, OAuth, Git, Linux Server Administration, Playwright

Digital Marketer | Hyssop Properties

October 2023 – May 2024 | Nairobi, Kenya

Website Management & Analytics

- Maintained user-friendly website aligned with brand standards and conducted regular content updates
- Monitored website analytics using data-driven insights to optimize performance and user experience

- Led complete website redesign and added construction venture section, improving site functionality

Content Creation & Design

- Created visually appealing graphics, banners, and design elements for multi-platform digital marketing campaigns
- Developed and maintained content calendar with targeted persona research for strategic content planning
- Designed professional logos for Hyssop Properties subsidiaries, ensuring brand consistency

Social Media & Campaign Management

- Managed comprehensive social media presence across YouTube, Meta, and TikTok platforms
- Analyzed and reported campaign performance using engagement metrics (likes, shares, comments, CTR)
- Provided actionable insights through data analysis to optimize content strategy and improve campaign ROI
- Presented analytical findings to marketing team and senior management for strategic decision-making

Data Analytics and Programming Intern | Mega Wholesalers

October 2023 – December 2023 | Nairobi, Kenya

Software Development & API Integration

- Developed algorithms and APIs using Python for data processing and business logic implementation
- Built interactive analytics dashboard using Laravel framework and Livewire for real-time data visualization
- Conducted comprehensive data analysis and processing to support business intelligence initiatives

Data Management & Analysis

- Performed advanced data research and calculations using Excel for business reporting
- Created automated data processing workflows to improve operational efficiency
- Delivered insights through dashboard visualizations and analytical reports

Contract Position | Geollen Preparatory School

January 2019 – August 2023 | Nairobi, Kenya

Brand Design & Documentation

- Designed school logo, letterheads, and professional documentation maintaining visual brand consistency
- Created and customized student certificates for pre-primary and grade 3 completion programs
- Developed professional document templates and editing workflows for administrative efficiency

Data Management & Administrative Support

- Maintained accurate assessment records in the KNEC system with 100% data accuracy
- Streamlined student record management processes for improved administrative workflow

Voluntary Service | Diwopa Catholic Primary School

January 2022 – March 2022 | Nairobi, Kenya

Administrative & Data Management

- Provided comprehensive administrative support including email management, document preparation, and parent communication
 - Managed school inventory system through systematic textbook auditing and record maintenance
 - Performed accurate data entry for student examination marks and academic records
-

EDUCATION

Bachelor of Science in Informatics and Computer Science

Strathmore University | 2019 – 2024

Second Upper Division

Certificate in Business Management

European School of Management and Technology Berlin | 2023

K.C.S.E

Naivasha Girls High School | 2015 – 2018

Mean Grade: A- (Mathematics: A-, English: B+)

CORE COMPETENCIES

Data Annotation & Quality Assurance

- High-precision data labeling and annotation for AI/ML model training
- Pattern recognition and detailed observation skills

- Structured guideline adherence and consistency maintenance
- Quality control and validation processes
- Task completion tracking and reporting

Technical Skills

- Programming Languages: Python, PHP, JavaScript, HTML, CSS
- Frameworks & Technologies: Laravel, Django, Flutter, Tailwind CSS, Livewire
- Databases: MySQL, Odoo Database Management
- Web Scraping & Automation: Playwright
- Integration & APIs: XML-RPC, RESTful APIs, OAuth, Payment Gateway Integration
- DevOps & Security: Linux Server Administration, BitLocker Encryption, Automated Monitoring, Backup Systems
- Development Tools: Git, GitHub, Figma, Canva
- Enterprise Systems: Odoo ERP, CRM Systems, Contract Management Platforms

Professional Skills

- Advanced attention to detail and precision-focused work execution
- Clear written communication and technical documentation
- Analytical thinking and problem-solving
- Process standardization and workflow optimization
- Time management and ability to meet strict deadlines
- Cross-functional collaboration and team training
- Data-driven decision making

Languages

- English: Native
- Swahili: Native
- German: Intermediate (B1-B2)

KEY ACHIEVEMENTS & CERTIFICATIONS

Technical Achievements:

- Successfully delivered 71.89 hours of high-quality AI annotation work for Meta's Llama project
- Led successful enterprise ERP implementation with 100% user adoption rate
- Achieved 95% data accuracy across database management systems
- Implemented zero-incident cybersecurity measures across enterprise infrastructure
- Delivered 90% sync accuracy for automated data synchronization processes
- Achieved 60% performance improvement in system optimization projects

Leadership & Training:

- Conducted comprehensive technical training for 15+ team members
 - Served as Single Point of Contact (SPOC) for major branding initiative
 - Led cross-functional collaboration between technical, marketing, and operations teams
-

PROFESSIONAL DEVELOPMENT

- Member of DeutschKlub (2019 – Present): Active participant in German language and cultural exchange programs
-

INTERESTS

- Reading Fiction: Exploring diverse literary genres for creative inspiration and analytical thinking
 - Traveling: Cultural exploration and international perspective development
 - Technology & AI: Staying current with developments in artificial intelligence and machine learning
-
